

# AFTERMARKET SERVICE

✓ **Safety**

✓ **Efficiency**

✓ **Compliance**

✓ **Reliability**

We've all been there...something's wrong at the plant. Production has come to a halt. It's an all-hands on deck effort to fix a problem that never should have happened in the first place. Sometimes the smallest things cause the biggest challenges. Nobody thinks about the Air Pollution Control equipment - until there's a problem.

- Reduce the risk to your operations by having your PCC equipment serviced by the experts who built it!
- Maintain a safe work environment
- Prevent costly nuisance shutdowns
- Reduce the Regulatory risk of exceeding permitted emissions
- Control operating costs by minimizing fuel consumption

PCC's services include the following:

- Checking all safety interlocks. Adjusting as necessary and verifying First Out annunciation
- Calibrating all transmitters/high temperature limits
- Checking all pressure/position/level switches and adjust as necessary
- Checking the stroke of all control valves
- Verifying and adjusting air to fuel ratios
- Inspecting internal refractory (if required).
- Leak testing all fuel safety shut off valves
- Addressing any problems/questions by plant operations.
- Checking fuel or water nozzles.
- Replacing any faulty components if spares are available at the plant.
- Checking the pilot burner setup and verify lighting reliability.
- Reporting results of checkout to include recommending replacement parts and unit upgrades

Customers with Service Plans receive **Priority Scheduling** and save 25% on PCC's standard service labor rates.

Contact Matthew Valancius, PCC's Aftermarket Manager, (412) 655-0955 x3177 or [mvalancius@pcc-group.com](mailto:mvalancius@pcc-group.com) for more info.
